

Drainage System Maintenance Contractors					
<p>It is wise to obtain at least three bids. <i>When requesting service from a contractor, provide the contractor with a copy of the inspection report and site map.</i> The information it contains will save time and make it easier for the contractor to prepare an accurate bid estimate. The contractors may contact Seattle Public Utilities if they require a clarification of the report. Seattle Public Utilities makes no recommendation whatsoever regarding any private contractor who performs drainage system maintenance.</p>
